

NEW PRODUCT

SPORT 5.5 CLUTCH ASSEMBLIES

Tilton Engineering is proud to introduce its new SPORT 5.5 Clutch Assemblies for road racing and short track racing applications. Since 1972, Tilton Engineering has been a leading supplier of small diameter racing clutches. Tilton clutches have won championships in nearly every form of motorsport worldwide, including F1, NASCAR, IMSA, Indy Car, SCCA, Formula Drift and SCORE.

Tilton's 8-leg SPORT 5.5 clutches are a direct replacement, and upgrade, for the QM V-Drive clutch. The value-packed SPORT 5.5 clutches are designed & manufactured using proprietary materials and manufacturing processes that increases service life of the clutch internals. Featuring a rigid clutch cover that resists deflection, with hardened steel thrust buttons installed into the legs, SPORT 5.5 clutches provide the most durability and highest performing clutch for the money bar none.

FEATURES

- Tilton's value-oriented 5.5" racing clutch.
- Direct replacement for QM 8-leg 5.5" clutches.
- Clutch cover leg design, with hardened steel thrust buttons, is most durable on the market.
- Accepts Tilton or QM 110-tooth cover-mount ring gears.
- 750 lb-ft torque capacity for 3-plate clutch. 500 lb-ft torque capacity for 2-plate clutch.
